Hazard Analysis Critical Control Point (HACCP), is the internationally recognized food safety system that focuses on the systems needed to identify and manage potential risks of foodborne safety hazards from reaching consumers. It pertains to any organization involved directly or indirectly in the food chain such as farms, fisheries, dairies, meat processors, and food service providers such as restaurants, hospitals, and catering services.

Hazard Analysis and Critical Control Point (HACCP) is a systematic preventive approach to food safety and pharmaceutical safety that addresses physical, chemical, and biological hazards as a means of prevention rather than finished product inspection.

HACCP is used in the food industry to identify potential food safety hazards, so that the key actions, known as Critical Control Points (CCPs) can be taken to reduce or eliminate the risk of the hazards being realized. The system is used at all stages of food production and preparation processes including packaging, distribution, etc.

Our Service

LSQA Middle East expertise has brought confidence and assurance to thousands of organisations giving you more than just a certificate.

- We provide an efficient, customised audit process that helps you to resolve the challenges of food safety
- Comprehensive management system auditing, supplier auditing, and product certification
- Compliance solutions that demonstrate a true commitment to food safety for your customers, employees and stakeholders
- Provide comprehensive training on all aspects of Codex HACCP.
- Perform gap-analysis to determine how your organisation may achieve Codex HACCP
- Conduct the entire certification process to ensure compliance with food safety standards.

Benefiting You

Each HACCP is an integral part of FSMS implementation, is based on sound science and offers the following benefits:

- Focuses on preventing hazards from contaminating food
- Prevents the occurrence of food recalls
- Enhances product quality and shelf-life
- Reduces product liability
- Minimises rejects and production costs
- Eliminates food outbreaks and enables you to respond quickly to food-borne illness complaints
- Allows you to deal effectively with regulatory agencies
- Allows you to deal effectively with regulatory agencies
- Places responsibility for ensuring food safety directly to food manufacturers or suppliers
- Apply HACCP principles to initiate corrective actions and prevent recurrence

With You All The Way

HACCP is just one of a suite of services we provide for ensuring the safety and quality of your products. Intertek is one of the world's leading food safety testing, auditing, inspection and certification bodies.

Our blend of expert analytical and advisory services help our customers to achieve compliance and improve safety, quality and efficiency. Whatever safety or quality issues you face, we have the flexibility and the experience to deliver the right solutions for your business.
