Food Saftey Management Systems Certification

ISO 22000:2018

ISO 22000 is an internationally recognized standard designed to systematically ensure food safety at every link of the supply chain. The standard established in 2005 and designed as an accessible, globally accepted standard, and is applicable to organizations of all sizes involved in any aspect of the food supply chain. The standard covers the key components for ensuring food safety including interactive communication, system management, implementation of pre-requisite programmes and the continual review and improvement of the system.

ISO 22000 incorporates HACCP principles and is compatible with ISO 9001 quality management systems, making it the ideal basis for implementing a comprehensive, cost effective food safety management system. ISO 22000 implementation avoids the cost of multiple audits.

Food safety management systems based on ISO 22000 promote continuous improvements in processes and performance, which can help your business become more efficient and because ISO 22000 is respected by governments and food safety experts worldwide, certification can open your business to new markets.

Overview

Used by organizations across the food chain to help deliver food that's safe to eat, ISO 22000:2018 is an excellent framework to help implement a food safety management system (FSMS). ISO 22000 is currently transitioning to the new version, ISO 22000:2018.

How food is grown, transported, manufactured and even consumed has changed significantly since the original standard was published over a decade ago. The new standard considers these changes and aims to help organizations reduce food safety hazards. In addition to making ISO 22000 and the resulting FSMS easier to integrate with other ISO management systems, the new version of the standard also introduces the Plan-Do-Check-Act (PDCA) cycle and risk-based thinking.

Benefiting You

- ISO 22000 certification can help you to give suppliers and stakeholders confidence in your hazard controls and enable you to put these hazard controls in place across your supply chain
- Introduce transparency around accountability and responsibilities
 Continually improve and update your systems so it stays effective
- Working to the ISO 22000 standard can help you to Introduce internationally recognized processes to your business
- ISO 22000 contains the food safety management system requirements of FSSC 22000 (which is a GFSI recognised scheme) and is used along with requirements for prerequisite programs for the appropriate industry sector

With You All The Way

LSQA Middle East is at the forefront of food safety management systems. We are fully accredited to offer third-party certification to the ISO 22000 standard and recognized by IAF.

Our food safety experts have the knowledge and experience to guide you successfully through the entire certification process. Our ISO 22000 services include multi level trainings including Awareness, Foundation, Documentation, implementation, internal auditing, and CQI/IRCA Lead Auditor courses.

Alongside, LSQA Middle East provides secind party audits amd pre-audit assessment. We also offer ongoing support through follow-up audits and certification renewal.

Our expert food safety auditors can work with you to guarantee your products are produced, prepared, packaged, distributed and certified to the highest standards of food safety.

Working with LSQA Middle East helps showcase and maintain products' safety and performance attributes. Our leadership and expertise in regulatory standards and certifications keeps you ahead of changes and challenges, and our capabilities and knowledge of the process from sourcing to market position brings solutions that are efficient, cost-effective, and meet best industry practices.
